Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1, 19 are rejected under 35 U.S.C. 102(a) as being anticipated by Madurawe (US 2005/0091630).

Regarding to claim 19, Madurawe discloses a memory cell comprising: a plurality of transistors (SRAM) configurable to store a value, wherein the value cans under-drive the transistor (410, pass-gate) in it off state. *See at least Fig. 4B; for example page 6, and the related disclosure.*

With regard to claim 1, they encompass the same scope of invention as to that of claim 19 except they draft in method format instead of apparatus format. The claims are therefore rejected for the same reason as set forth above.

The recitation “for suppressing sub-threshold leakage in a transistor” has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not

Art Unit: 2827

accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Allowable Subject Matter

2. Claims 2-18, 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach the memory circuit as note in claim 19 above and further include the limitation of claims 20, 21, 22, 23. Method as noted in claim 1 and further including limitation of claims 2, 5, 6, 10, 13, 14, 17, and 18.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
